

This image shows a blank ledger page. It features a grid of 16 vertical columns and 20 horizontal rows. The grid is formed by thin black lines. There are five vertical gray bars that span the full height of the grid, acting as dividers. These bars are located at the 3rd, 5th, 7th, 9th, and 11th columns from the left. Each gray bar is approximately 1.5 grid units wide. The spaces between the gray bars, as well as the first two columns on the left and the last two columns on the right, contain the grid cells.

This image shows a blank grid with 20 columns and 30 rows. The grid is divided into five equal-width sections by four vertical gray bars. Each section contains 4 columns of grid cells. The grid is otherwise empty, with no text or data.

This image shows a grid of 20 columns and 30 rows. The grid is composed of thin black lines. Five vertical columns are shaded in a light gray color. These shaded columns are located at the 3rd, 5th, 7th, 9th, and 11th positions from the left. The remaining 15 columns are unshaded. The grid is otherwise empty.

The image shows a rectangular grid consisting of 20 columns and 25 rows of small cells. Five vertical gray bars are positioned at regular intervals, dividing the grid into ten equal sections, each containing two columns. The bars are located at the boundaries between columns 2 and 3, 4 and 5, 6 and 7, 8 and 9, and 10 and 11. The grid is otherwise empty and contains no text or data.
