

## Virginia Commonwealth Games Archery Guidelines:

Everyone entering the field area will be required to have a face covering and their own hand sanitizer.

For parents and spectators:

There must be a social distance of six feet between tents, tables and chairs. Families are permitted to be closer to each other within their own tents. Face coverings are required at all times.

For archers:

Face coverings are permitted to be removed, only when on the shooting line. They must be in place when going downrange for scoring. Only one archer per target will be on the shooting line at a time. No more than three archers will be shooting at each target bale. When scoring, alternate targets will go downrange at a time. For example, all of the odd numbered targets will score first and when all have returned, then the even numbered targets will go downrange and score.

For the officials:

They will only go downrange if requested and will have a seating area that will maintain social distancing requirements.

We realize that these restrictions are not normal for us, but we must follow these rules in order to run the event. As always, our main concern is the health and safety of our players and their families.
